

CNFJ-3000 Allgrand: Powering Industrial Energy Storage Systems

CNFJ-3000 Allgrand: Powering Industrial Energy Storage Systems

Unlocking High-Capacity Energy Solutions

Industrial energy storage demands CNFJ-3000 Allgrand batteries like never before. As factories and power stations increasingly adopt renewable integration strategies, this 3,000AH colossus stands as the backbone of modern energy infrastructure. a single battery unit capable of powering an entire data center's backup system during outages - that's the scale we're discussing.

Technical Specifications Breakdown

Voltage Configuration: 2V/cell modular design

Cycle Life: 3,500+ cycles at 80% DOD

Self-Discharge Rate:
