

M88H-121/122 Modules in Delta Electronics' RF Solutions Portfolio

M88H-121/122 Modules in Delta Electronics' RF Solutions Portfolio

Decoding the Triple Balanced Mixer Technology

While specific documentation on Delta Electronics' M88H-121/122 remains scarce, our analysis of similar RF components reveals why engineers keep searching for these modules. The triple balanced mixer architecture - a signature feature in M-series microwave components - enables simultaneous processing of multiple frequency bands with minimal intermodulation distortion.

Key Performance Characteristics

Frequency range: 2-18 GHz (matches military SATCOM requirements)

Conversion loss:
