

# UP-G250-12 Upower: The Silent Powerhouse Revolutionizing Energy Storage

UP-G250-12 Upower: The Silent Powerhouse Revolutionizing Energy Storage

## Why This Unassuming Battery Is Making Data Centers Sweat

When engineers at Tokyo's smart grid control center replaced their legacy UPS systems with the UP-G250-12 Upower modules last spring, they discovered something unexpected - their cooling costs dropped 18% overnight. This 12V sealed lead-acid battery isn't just storing power, it's rewriting the rules of energy efficiency.

## Core Specifications That Defy Physics

12V nominal voltage with  $\pm 0.5\%$  voltage regulation

250Ah capacity (C10 rating at 25°C)

Cyclic durability: 1,200 cycles at 50% DOD

Self-discharge rate:
