

# Understanding SPI500/630/1000/1260K-B in Kehua Digital Energy Solutions

Understanding SPI500/630/1000/1260K-B in Kehua Digital Energy Solutions

## Decoding the SPI Terminology in Power Systems

While SPI commonly refers to Serial Peripheral Interface in electronics, Kehua Digital Energy's SPI500/630/1000/1260K-B series represents a specialized power conversion platform. These modular UPS systems combine double conversion technology with advanced battery management, achieving up to 96% efficiency in ECO mode.

## Key Technical Specifications

Power range: 500-1260kVA modular configuration

Input power factor: >0.99 across load range

Output voltage distortion:
